

## HOW TO PLAY SOCCER

Watch the checkered print board,  
eyeing it down like a hawk.

Think strategically and tactically,  
predicting and anticipating each move.

The coach planning every formation with care,  
moving each peice confidently or hesitantly.

Using your brain in a clever way,  
tricking others into doing the wrong move.  
Slowly but swiftly taking and defeating each piece,  
winning or losing other pieces along the way.

Calculating what each piece is trying to do,  
figuring out if they are threatening a crucial piece.

Each move quick,  
though significant.
